Introduction

January 2007 will begin our 27th Year in the parking and vehicle access control industry.

PTC
INDUSTRIES™

PTC Industries is a manufacturer and supplier of vehicle parking systems, revenue collection, vehicle access controls and innovative industrial systems with worldwide distribution that meets today's rapidly developing transportation and urban planning applications.

Quality materials and workmanship is a tradition with PTC that dates back to 1980 when Donald Shorts and Lee Shorts first began to build a reputation for high-quality products and excellence in service.

Today, PTC maintains a network of manufacturing divisions along with the industry's most diversified sales and service support teams to reflect that dedication to quality and performance that originated over a quarter century ago.

The PTC manufacturing & corporate headquarters is in Berea, Ohio. Manufacturing, assembly, technical support and distribution are all managed within this location. PTC's executive team leads a company that researches new technologies and innovative ideas, and converts them into true solutions for our clients.

Today, our clients range from commercial, institutional (i.e.; hospitals, universities) municipalities, national governments, and private entities from around the world.

Our Principles:

Our business relationships are based upon a partnership philosophy that respects and addresses the needs and concerns of our customers.

- *PTC observes the highest ethical business standards and holds each employee accountable to those standards.*
- *We respond to our customers' needs with quality, timely, economical, application – specific solutions to their parking, security, revenue and traffic control problems.*
- *We protect our customers' investment by manufacturing products with system compatibility and upgrade ability.*
- *We provide enduring customer satisfaction through support and service at all levels*
- *We develop long-term, mutually profitable partnerships with supplier. We seek suppliers who share our high standards for quality products and services, timely delivery and integrity.*
- *We select distributors, dealers, and representatives who share our guiding principles.*

At PTC, building quality customer relationships is just as important as building quality products.

Our Vertical Process:

The success of PTC consists of our company personnel, consultants, partners, vendors, dealers/distributors, and our worldwide clientele.
